

HW7: 3D Practical Prep

Axial Skeleton + Pelvic Girdle

BIOL 2113 | Fall 2026 | 30 points

Activity link and due date: see the HW7 page in D2L.

SUBMIT ONE PDF TO D2L

Complete all 13 items, use Download Submission PDF, then upload that one PDF to HW7: 3D Practical Prep in D2L and press Submit. Recorded progress is not a homework submission.

Before you begin

1. Use a laptop or desktop, a current browser, and an internet connection. Plan to complete the activity in one visit.
2. Enter your first and last name exactly as they appear in D2L and your school email. Enter a course access code only if your instructor supplies one. No student account or login is required.
3. Read the session notice, check the acknowledgement, and press **Begin new attempt**.

YOUR NAME, AS IT APPEARS IN D2L	SCHOOL EMAIL	COURSE ACCESS CODE (ONLY IF SUPPLIED BY YOUR INSTRUCTOR)
Sample Student	sample@school.edu	
☒		
I understand that this attempt cannot be reopened and that I must upload one PDF to D2L.		Begin new attempt

The opening form. Use your D2L name and school email. The access code is optional unless your instructor supplies one.

KEEP THIS PAGE OPEN

Refreshing, closing the tab, reopening the site, or switching devices starts a new attempt. Previous attempts cannot be restored, even on the same computer. Download and check your PDF before closing this page.

What is recorded

Your name, school email, progress, answers, checks, clue use, reasoning, and PDF generation are recorded for your instructor. Repeat visits are separate attempts. These records help identify difficult structures. First-attempt accuracy, retries, and clue use are not graded. **You still must submit the generated PDF to D2L.**

Work through all 13 items

12 full scenes: Typical Vertebra; Adjacent Vertebrae; Typical Cervical Vertebra; C1: Atlas; C2: Axis; Cervical vs Thoracic vs Lumbar; Sacrum; Thoracic Cage; Sternum; Rib; Coxal Bone; Bony Pelvis. **Item 13:** Quick ID: Hyoid.

A labeling scene. Scene buttons are at the top; the structure bank is on the left; numbered tags are on the model; your answers are on the right.

Controls

Drag to rotate. Scroll or pinch to zoom. Right-drag or two-finger drag to pan. Check the orientation guide before naming a structure. **Reset View** restores the starting view; **Recenter Model** brings a panned specimen back into view. Faded tags are on the far side: rotate to see them.

- 1. Labeling:** answer every numbered tag, then press **Check Labels**. Correct labels lock. Incorrect labels are flagged without the answer. Reorient and retry. Optional clues unlock after two misses on a tag.
- 2. Practical Check:** press **Start Practical Check**. Type the lettered structure names with no word bank. Press **Submit Practical Check**; retry flagged items until all are correct.
- 3. Prove it:** press **Continue to Prove it**. Answer each question in your own words with two or three sentences about anatomical relationships. Press **Submit Reasoning**. The 25-character minimum unlocks the button; it does not guarantee full credit.
- 4. Evidence image:** after completion, inspect the saved view. Rotate and press **Update Evidence Image** if needed. The image goes into your PDF.
- 5. Hyoid:** type the bone name, press **Submit**, then **Finish**. There is no labeling or Prove it stage.

You can visit scenes in any order and return to them while this page remains open.

Download, check, and submit

The instructor log does not upload anything to D2L. Downloading a PDF also does not submit it.

SUBMISSION PACKAGE

HW7 complete. Are you practical-ready?

✓ 1 Typical Vertebra	✓ 2 Adjacent Vertebrae	✓ 3 Typical Cervical Vertebra
✓ 4 C1: Atlas	✓ 5 C2: Axis	✓ 6 Cervical vs Thoracic vs Lumbar
✓ 7 Sacrum	✓ 8 Thoracic Cage	✓ 9 Sternum
✓ 10 Rib	✓ 11 Coxal Bone	✓ 12 Bony Pelvis
✓ 13 Quick ID: Hyoid		

[Download Submission PDF](#) [Back to scenes](#)

The Submission page. All 13 items must show a check mark before you create the complete PDF.

1. Open **Submission**. Check that all 13 items are complete, including the hyoid. Click any incomplete item to finish it.
2. Press **Download Submission PDF**. Save **HW7-your-name.pdf**. Keep the activity page open until you check the download.
3. Open the PDF. Check the list below. If something is missing, return to the open activity, finish or update it, and download a corrected PDF.
4. Open **D2L > Assignments > HW7: 3D Practical Prep**. Attach **exactly one PDF**, then press **Submit** by the posted deadline.
5. Check D2L's submission confirmation and attachment. Keep a copy of your PDF.

Your full-credit submission checklist

- [] The PDF was created using Download Submission PDF.
- [] My name matches the name in D2L.
- [] The cover says **13 of 13 items complete**.
- [] The PDF has **14 pages**: one cover, 12 scene pages, and one hyoid page.
- [] Each item has a readable evidence image. All applicable completion entries say Complete. The hyoid labeling and reasoning entries correctly say n/a.
- [] All Prove it answers are present, in my own words, and explain identifying relationships.
- [] I uploaded **one PDF** to D2L and confirmed submission.

Screenshots, phone photos, separate scene images, a website link, or a progress status message do not replace the required PDF.

Reasoning, grading, and troubleshooting

Explain how you know

Weak: "The AIIS is the one lower down."

Stronger: "I follow the iliac crest forward to the ASIS. The AIIS is the projection below the ASIS, just above the acetabulum."

Use relationships that remain useful on a different specimen: connections, neighboring landmarks, direction, or what passes through an opening. Completion alone does not guarantee all reasoning points.

How the 30 points are earned

Component	Points
12 labeling scenes completed to mastery	12
12 no-word-bank Practical Checks completed	12
Original Prove it answers that explain anatomical relationships	4
Complete generated PDF, including hyoid, submitted to D2L	2
Total	30

Retries and clues do not cost points. Reasoning is graded for anatomical explanation, not polished wording. Appearance-only answers and copied responses do not earn full reasoning credit.

If something goes wrong

Blank model: keep the page open, check your connection, and wait. Contact your instructor before refreshing or switching browsers.

Model off screen or tag faded: use Recenter Model or Reset View, or rotate to see the far-side tag.

Button disabled: answer every required item. Reasoning needs at least 25 characters per response.

Progress not recorded: reconnect and press Retry recording. Keep the page open. You can still generate its PDF and submit that file to D2L.

PDF fails: keep the page open; check connectivity and download permissions; try the download again. Contact your instructor before the deadline if it still fails.

Already closed or refreshed: the old attempt cannot be restored. If you downloaded a complete PDF, submit it. Otherwise start a new attempt and contact your instructor if timely completion is affected.

Before the practical: identify these structures on unlabeled physical specimens from multiple orientations without notes or a word bank. Use your missed structures to guide further practice.
